Api Standard 527 American
Petroleum API Standard 527. Seat
Tightness of Pressure Relief Valves.
FOURTH EDITION | NOVEMBER 2014
| 5 PAGES | \$90.00 | PRODUCTNO.
C52704. This standard describes
methods of determining the seat
tightness of metal- and soft-seated
pressure relief valves, including
those of conventional, bellows, and
pilot- operated designs. API
Standard 527 - American Petroleum
Institute API STD 527. September 1,
1964. COMMERCIAL SEAT
TIGHTNESS OF SAFETY RELIEF
VALVES WITH METAL-TO-METAL
SEATS. This standard describes a
method of determining seat
tightness of safety relief valves as
covered in API Standard 526:

Flanged Steel Safety Relief Valves for Use in Petroleum Refineries. API STD 527 - Seat Tightness of Pressure Relief Valves ... API Standard 527, from the American Petroleum Institute, describes seat tightness testing and the maximum acceptable leakage rates for pressure relief valves. The current version of the standard was reaffirmed in 2007. API Standard 527 -Allied Valve Inc. This standard describes methods of determining the seat tightness of metal and soft-seated pressure relief valves, including those of conventional, bellows, and pilot-operated designs. The maximum acceptable leakage rates are defined for pressure relief valves with set pressures from 103 kPa gauge (15 psig) to 41,379 kPa gauge (6000 psig). API STD 527 :

2020 : Seat Tightness of Pressure Relief Valves API Std 527 currently viewing. July 2020 Seat Tightness of Pressure Relief Valves, Fifth Edition API Std 527 - Techstreet api 527 : 2014 Superseded View Superseded By Superseded A superseded Standard is one, which is fully replaced by another Standard, which is a new edition of the same Standard.
