It is commonly believed that populist politics and social media pose a serious threat to our concept of truth. Philosophical pragmatists, who are typically thought to regard truth as merely that which is 'helpful' for us to believe, are sometimes blamed for providing the theoretical basis for the phenomenon of 'post-truth'. In this book, Sami Pihlström develops a pragmatist account of truth and truth-seeking based on the ideas of William James, and defends a thoroughly pragmatist view of humanism which gives space for a sincere search for truth. By elaborating on James's pragmatism and the 'will to believe' strategy in the philosophy of religion, Pihlström argues for a Kantian-inspired transcendental articulation of pragmatism that recognizes irreducible normativity as a constitutive feature of our practices of pursuing the truth. James himself thereby emerges as a deeply Kantian thinker. Throughout history, man has been searching for better ways to gather information about his universe. But although they may have longed for it, not even the most brilliant minds could conceive of a device as infinitely powerful or as immeasurably precise as the Macroscope, until the twenty-first century. This is a story of man's desperate search for a compromise between his mind and his heart, between knowledge and humanity. African life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever African people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of African Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. Based on the provocative and popular New York Times op-ed, this memoir alternates between the examination of a working-class upbringing and a cultural analysis of the historical, psychological, and sociological sources that make up the roots of toxic masculinity and its impact on society. As progressivism changes American society, and globalism shifts labor away from traditional manufacturing, the roles that have been prescribed to men since the Industrial Revolution have been rendered obsolete. Donald Trump's campaign successfully leveraged male resentment and entitlement, and now, with Trump as president and the rise of the #MeToo movement, it's clear that our current definitions of masculinity are outdated and even dangerous. Deeply personal and thoroughly researched, the author of *The People Are Going to Rise Like the Waters Upon Your Shore* has turned his keen eye to our current crisis of masculinity using his upbringing in rural Indiana to examine the personal and societal dangers of the patriarchy. *The Man They Wanted Me to Be* examines how we teach boys what's expected of men in America, and the long-term effects of that socialization which include depression, shorter lives, misogyny, and suicide. Sexton turns his keen eye to the establishment of the racist patriarchal structure which has favored white men, and investigates the personal and societal dangers of such outdated definitions of manhood. "By carefully and soberly examining his own story, Sexton deconstructs American life and gives many examples of how pervasive toxic masculinity is in our culture." —Henry Rollins, *Los Angeles Times* "This book is critically important to our historical moment . . . Crackles with intensity and absolutely refuses to allow the reader to look away for even a moment from the blight that toxic masculinity in America has wrought." —Nicholas Cannariato, NPR James and Katie Falcon are astonished when a Time Ship appears in the cellar with their long-deceased ancestor Captain Horatio Falcon at the helm. The Ship includes a fresh food supply of two cows. Pandemonium breaks out when Great-Aunt Dorothea is faced with a cow in her lounge. The spooked second cow stumbles into the Time Ship's controls, despatching the Ship into the past at 'Lost Island'. But it is swarming with bloodthirsty treasure-seeking pirates and the crew's odds of survival appear impossible. Then the youngsters discover the Time Ship's mysterious source of power and the odds of their survival and their future change spectacularly. Beloved Nebraska folklorist Roger Welsch explores our passion and love for dogs.
