its market launch in 1989/90. The development of injection technology with injection pressures greater than 2,000 bar, the electronic diesel control and optimal turbocharging adaptation give the diesel engine unique power capabilities at high torque and thus an excellent drive experience at the same time as low exhaust emissions and extremely low fuel consumption. For this reason, the diesel engine is an interesting source of drive even for demanding applications, such as in premiere-class passenger vehicles and SUVs. Included on this CD you will find a few selected engine descriptions and technical articles documenting the progress of the diesel engine's development. All of these articles appeared in MTZ (Motortechnische Zeitschrift) between 2000 and 2004. In addition to the engine descriptions, you will also find information on ways to further reduce harmful emissions, focusing on particles and nitrogen oxide emissions. The range of articles provides a cross-section of the results from research and development activities on the subject of diesel engines in the European automotive industry and at scientific institutes. In this period, there were two not insignificant anniversaries: Robert Bosch GmbH celebrated 75 years of diesel injection and Volkswagen AG celebrated 25 years of the diesel engine. I am certain that this CD will stir your specialist interest and I hope that it provides you many enjoyable hours of reading. Implementing Management Innovations: Lessons Learned from Activity Based Costing in the U.S. Automobile Industry is the result of a long-term study of the implementation of activity based costing (ABC) inside two of America's largest automobile companies. The research advances our theoretical and practical understanding of the implementation of management innovations by tracing the evolution of ABC from the corporate level down to its eventual rollout at the plants. Another distinguishing feature of the study is the blend of field research methods and hypothesis testing to determine the factors that led to implementation success for managers and ABC development teams. Many of the findings of the study have implications for the implementation of other types of management innovations. Diesel Engine Technology covers the design, construction, operation, diagnosis, service, and repair of both mobile and stationary diesel engines with a simple-to-understand presentation. Content relates to on- and off-road vehicles, as well as marine, agricultural, and industrial applications. This text is a valuable resource for anyone involved in the service and repair of diesel engines, as well as those preparing for ASE Medium/Heavy Truck Test T2--Diesel Engines, Test T6--Electrical/Electronic Systems, and Test T8--Preventive Maintenance Inspection. Content is correlated to the Diesel Engines, Electrical/Electronic Systems, and Preventive Maintenance Inspection (PMI) sections of the 2018 ASE Educational Foundation Medium/Heavy Duty Truck Task List. ASE Educational Foundation Required Supplemental Tasks and Workplace Employability Skills are covered. The latest standards for diesel engine oils, ultra-low sulfur fuel, and biodiesel fuel are included. Natural Hazards - Risk, Exposure, Response, and Resilience demonstrates advanced techniques to measure risks, exposures, responses, and solutions to hazards in an array of communities. Eleven original research reports by international scholars on hazard assessment and management are organized into four sections: studies assessing risk using in-depth modeling and technological detection to provide insight into problems associated with earthquakes, torrential rains, and nuclear power plant safety; studies revealing the spatial distributions of exposure and impacts from an assortment of hazards; studies examining human response to increased awareness of the patterns of hazard; and a study demonstrating assessment of resilience of sociotechnological systems to natural hazards. This volume contributes new conceptual and practical commentaries to assess, mitigate, and plan for disasters.
