In this richly illustrated history of the past hundred years of motoring, expert Jon Pressnell explores the main developments, such as the introduction and refinement of the driving test; the improvement of roads and the impact of the motorway; and how affordable cars such as the Mini have helped democratise driving. The evolution of the car itself is also explored, from the coachbuilt custom-made cars of the 1910s, through to the more attainable mass-produced models of the inter-war years, and finally to today's complex and sometimes hybrid-powered vehicles.
