Chestnut Hill Local columnists Mike Todd, Janet Gilmore, Hugh Gilmore, and Jim Harris, (L-R), have not only survived in the troubled and struggling newspaper business, they have amassed a devoted following of fans who shower them with lavish presents like scrapple, bowling balls, and money from Nigerian bank accounts. Until recently, their columns were available only to the readers of the Local, but now you, too, can "LOL" as:

- Hugh warns of the "Enemies of Reading"
- Janet remembers old friends, old flames and ex-coworkers
- Mike deals with wrens, ferrets, and a pregnant wife in his house
- Jim dispenses dubious advice and rails against the system

They each have their own style and shtick, but they share a love of language and an innate ability to find the humor in everyday life. Not since Ben Franklin dined alone at the Mermaid Inn has Chestnut Hill seen such a concentration of comedic talent. Here, from among their hundreds of articles, hand-picked by a rigorous process of "One potato, two potato," is a rollicking roundup of mirthful monologues for your gracious consideration.

Knowledge intensive entrepreneurship lies at the core of the structural shift necessary for the growth and development of a knowledge based economy, yet research reveals that the EU has fewer young leading innovators, and Europe's new firms do not adequately contribute to industrial growth. This is especially true in the high R&D intensive, high-tech sectors. This structural malaise, undermining Europe's growth potential, is well diagnosed, but poorly understood. This volume fills this important gap by exploring new firms that have significant knowledge intensity in their activity and develop and exploit innovative opportunities in diverse sectors. Through an evolutionary and systemic approach to entrepreneurship, focusing on knowledge intensive entrepreneurship as both a micro and a macro phenomena and analyzing firms in the context of various socio-economic models, the authors explore firms creation and origins around the world, their organization, strategies and business models as well as the role of innovation systems and institutions in their formation and growth. This comprehensive research text is vital reading for academics, researchers and students of high-tech and knowledge intensive entrepreneurship as well as those with an interest in industrial dynamics, innovation management and public policy. "Labeled either as the 'next industrial revolution' or as just 'hype', nanoscience and nanotechnologies are controversial, touted by some as the likely engines of spectacular transformation of human societies and even human bodies, and by others as conceptually flawed. These challenges make an encyclopedia of nanoscience and society an absolute necessity. Providing a guide to what these understandings and challenges are about, the Encyclopedia of Nanoscience and Society offers accessible descriptions of some of the key technical achievements of nanoscience along with its history and prospects. Rather than a technical primer, this encyclopedia instead focuses on the efforts of governments around the world to fund nanoscience research and to tap its potential for economic development as well as to assess how best to regular a new technology for the environmental, occupational, and consumer health and safety issues related to the field. Contributions examine and analyze the cultural significance of nanoscience and nanotechnologies and describe some of the organizations, and their products, that promise to make nanotechnologies a critical part of the global economy. Written by noted scholars and practitioners from around the globe, these two volumes offer nearly 500 entries describing the societal aspects of nanoscience and nanotechnology."--Publisher's description.
