Toward A Logic of Meanings Jan 31 2020 This
book, the last one written by Piaget, presents a
new line of empirical studies based on a revised
formulation of his theory of the development of
logical reasoning. The amended theory overcomes
many problems and criticisms of his earlier
formulations by providing a fresh explanation for
the origin of mental operations and mental
organization based on the concept of meaning. It
also offers a more elegant vision of the
continuity in mental development from birth to
adulthood. As the final revision of Piaget's
theory -- and one that opens up new areas of
inquiry -- this book calls for a reinterpretation
of his earlier work -- a task which will occupy
scholars for decades to come.

A Textbook of Company Law, 11th Edition Jul 31
2022 The eleventh edition of this essential
textbook captures the changing landscape of
Company Law. The book has been revised to include
the notable changes brought about by the
Companies (Amendment) Act, 2015. It provides an
incisive analysis of the strategic shift brought
by the Companies Act, 2013 and the dimensions of
the enabling provisions of the new law.

Interesting and easy to understand, this book is a concise text on company law. It discusses the core features of company law, the regulations binding the relationships, the legal strategies to address the ascending problems and the legal trade-offs. Besides focus on the core topics, all the judicial and statutory developments, taken place so far, have been taken into account. Case laws are integrated throughout the book to illustrate key topics. Students preparing for Company Law or Corporate Law paper of respective examinations will find this book immensely useful.

Introduction to Probability, Second Edition May 17 2021 Developed from celebrated Harvard statistics lectures, Introduction to Probability provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of

applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use stories to uncover connections between the fundamental distributions in statistics and conditioning to reduce complicated problems to manageable pieces. The book includes many intuitive explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment. The second edition adds many new examples, exercises, and explanations, to deepen understanding of the ideas, clarify subtle concepts, and respond to feedback from many students and readers. New supplementary online resources have been developed, including animations and interactive visualizations, and the book has been updated to dovetail with these resources. Supplementary material is available on Joseph Blitzstein's website www.stat110.net. The supplements include:

- Solutions to selected exercises
- Additional practice problems
- Handouts including review material and sample exams
- Animations and interactive visualizations created in connection with the edX online version of Stat 110.
- Links to lecture videos available on iTunes U and YouTube

There is also a complete instructor's solutions manual available to instructors who require the book for a course.

Workshop Proceedings of the 11th International Conference on Intelligent Environments Sep 20 2021 With emerging trends such as the Internet of Things, sensors and actuators are now deployed and connected everywhere to gather information and solve problems, and such systems are expected to be trustworthy, dependable and reliable under all circumstances. But developing intelligent environments which have a degree of common sense is proving to be exceedingly complicated, and we are probably still more than a decade away from sophisticated networked systems which exhibit human-like thought and intelligent behavior. This book presents the proceedings of four workshops and symposia: the 4th International Workshop on Smart Offices and Other Workplaces (SOOW'15); the 4th International Workshop on the Reliability of Intelligent Environments (WoRIE'15); the Symposium on Future Intelligent Educational Environments and Learning 2015 (SOFIEEe'15); and the 1st Immersive Learning Research Network Conference (iLRN'15). These formed part of the 11th International Conference on Intelligent Environments, held in Prague, Czech Republic, in July 2015, which focused on the development of advanced, reliable intelligent environments, as well as newly emerging and rapidly evolving topics. This overview of and insight into the latest developments of active researchers in the

field will be of interest to all those who follow developments in the world of intelligent environments.

Disaster Policy and Politics Apr 03 2020 In the Second Edition of *Disaster Policy and Politics*, author Richard Sylves covers the hottest and most controversial issues in the fields of disaster management and homeland security. The work provides a careful and balanced analysis of U.S. disaster politics and policy, paying special attention to the role of key actors—decision makers at the federal, state, and local levels. The book's comprehensive "all-hazards" approach introduces readers to important public policy, organizational management, and leadership issues

whether they aspire to be emergency managers or not. Crafted to be more instructor- and student-friendly, the 10-chapter volume includes boxed mini-case studies depicting disasters large and small. Among its aims are to provide illuminating examples, context, and humanitarian relevance.

Children's Rights: Progress and Perspectives Feb 23 2022 The International Journal of Children's Rights has been a major player in all this. Its impact is worldwide. It has established itself as the leading journal in the field. The journal is now in its 19th year, and is flourishing. This volume has been compiled not only to commemorate the journal's work, but also the 20th anniversary of the Convention coming into operation, and of the first World Summit on Children. An anthology of the best articles published in these formative years, this volume offers a representative sample of what the journal has achieved. Some of the articles are ones which are frequently cited, whilst others are less well known; some deal with theory, others with practice. The case for children's rights is to be found throughout this collection, as is the history of children's rights.
