This book contains the latest results on the plasma environment of Mars and its interaction with the solar wind. These results include mapping of the plasma environment with the instruments on Mars Express and Mars Global Surveyor, the latest numerical simulations, and theoretical studies. This comprehensive examination of the Mars environment also sets the stage for the interpretation of the Venus Express measurements. Technical manual for applicants who are preparing for their private, commercial, or flight instructor pilot certificates with a helicopter rating. Also could be aid in training students. Contains detailed coverage of helicopter aerodynamics, performance, and flight performance. Includes items such as weather, navigation, radio navigation, and communications. 81 charts and tables. Because malnutrition in early life significantly affects the physical and mental development of children, addressing malnutrition is fundamental to the development of Vietnam's human capital. Economic development of the nation depends on the strength, resilience, and intelligence of its workforce. Governments dedicate millions of dollars annually to health and education, recognizing that individual

losses in productivity may run as high as 10 percent of lifetime earnings and that as much as 11 percent of GDP could be lost each year in Asia and Africa due to undernutrition. The ethnic minority groups living mainly in the northern midlands and in the mountainous and central highlands regions are consistently more undernourished than the Kinh majority. Despite decreases in stunting, the prevalence of stunting among ethnic minority children is still twice that in the Kinh ethnic group. There has been an overall decline in wasting of 1.7 percent between 2000 and 2011, although only the richest quintile showed a significant reduction (3.4 percent). These data, along with an overall decrease in the prevalence of wasting and stunting, indicate an increase in nutrition inequality between 2000 and 2011. Moreover, it is noteworthy that the ethnic minority groups constitute the majority of the undernourished populations in most of the 10 provinces with the highest rates of stunting among children under 5 years old. This analytical report describes the very high rates of malnutrition among ethnic minority populations in Vietnam. It assesses the determinants and causes, using a causal framework and systems analysis; reviews current commitments and policies directed at reducing disparities in malnutrition; examines implementation of nutrition-specific and nutrition-sensitive interventions, particularly those that require multisectoral coordination and collaboration; draws conclusions based on the analysis; and recommends how policies and programs can be strengthened to reduce inequities and fulfill the economic potential of all ethnic groups.

This book highlights research that expands on our knowledge of second- language collocation acquisition. It presents original findings based on the largest collocation database to date, encompassing over 8,000 collocations: verb + noun, adjective + noun, and noun + noun. These collocations, collected from a one-million-learner corpus, were not confined to English as a foreign language (EFL) learners at a particular proficiency level, but also included learners at three levels. As such, the book provides a panoramic view regarding L2 collocation acquisition, not only in terms of learners' acquisition of different types of collocations, but in terms of the developmental patterns in L2 collocation learning. One major discovery is that there is a collocation lag as learners' proficiency levels

rise, which is associated with vocabulary increase, in particular semantic domains—a remarkable insight for second-language acquisition researchers, English teachers and EFL learners alike. The findings reported shed new light on how collocations are acquired by EFL learners, offering guidance on how they can best be taught. In closing, the book discusses pedagogical aspects that arise from considering how learners can be helped with collocation learning. This manual contains facts and formulas that are useful in courses in mathematics and mechanics in colleges and engineering schools, arranged and printed in a form that makes them readily available for rapid work with minimum eye strain. Includes complete worked-out solutions to all of the "Try It Yourself "exercises, the odd-numbered exercises, and all of the "Chapter Quiz "exercises. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. This book presents Proceedings of the International Conference on Intelligent Systems and Networks (ICISN 2021), held at Hanoi in Vietnam. It includes peer-reviewed high-quality articles on intelligent system and networks. It brings together professionals and researchers in the area and presents a platform for exchange of ideas and to foster future collaboration. The topics covered in this book include—foundations of computer science; computational intelligence language and speech processing; software engineering software development methods; wireless communications signal processing for communications; electronics track IoT and sensor systems embedded systems; etc.
