"Designed to be used in combination with the fifth edition of the 'Phlebotomy essentials' textbook as a valuable learning resource that will help the student master the principles of phlebotomy by reinforcing key concepts and procedures covered in the textbook."--Pref. Phlebotomy Test Prep Volume One, 2nd Edition was written out of the desire to provide a quality, but concise review book for phlebotomy technicians. Questions were constructed from all the areas of study in the phlebotomy curriculum ranging from communication skills to pre, intra and post analytical procedures. Constant revision of the questions will help the student to master the contents in preparation for the phlebotomy certification exam. Reviewing the 1000+ questions in Phlebotomy Test Prep volume two and three would equally assist the phlebotomy Technician student to be over prepared for the exam. - Jane John-Nwankwo CPT, RN, MSN. National Certified Phlebotomy Technician Exam Practice Questions are the simplest way to prepare for the National Center for Competency Testing Exam. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more, or if you're already prepared enough to achieve success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our National Certified Phlebotomy Technician Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and

using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our National Certified Phlebotomy Technician Exam Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand. You might think this is just another study guide. However, our healthcare test prep isn't like other study guides. What is the next step after puncturing a finger during a skin puncture procedure?, Define: needle has the largest interior diameter. When you elevate a limb that is bleeding it will? When a patient's arm is swollen with excess fluids, this is called? Just a hint of what you will find in this study guide Phlebotomy uses large, hollow needles to remove blood specimens for lab testing or blood donation. Each step in the process carries risks - both for patients and health workers. Patients may be bruised. Health workers may receive needle-stick injuries. Both can become infected with bloodborne organisms such as hepatitis B, HIV, syphilis or malaria. Moreover, each step affects the quality of the specimen and the diagnosis. A contaminated specimen will produce a misdiagnosis. Clerical errors can prove fatal. The new WHO guidelines provide recommended steps for safe phlebotomy and reiterate accepted principles for drawing, collecting blood and transporting blood to laboratories/blood banks.
