[Beach Explorer](#) Jan 22 2022 Explore the beach and its secrets as never before! What makes the tides tick? Do sharks lay eggs? Why are sea levels rising? Investigate the wonderful world of sand, watch how crabs move and marvel at spectacular seashells as you become a beach explorer. This book is bursting with hands-on activities, fascinating experiments and amazing facts to discover at home or on the shore. You can: Become a tide fort champion Create a miniature rock pool Find out what makes starfish so special Spy on a hermit crab battle Design your own fish Identify where beach litter comes from Experiment with seashells. Heather Buttivant, award-winning wildlife blogger and author of Rock Pool: Extraordinary Encounters Between the Tides, invites you on an adventure to meet the mysterious creatures that live on the beach and discover what you can do to protect them. Please note this is a fixed-format ebook with colour images and may not be well-suited for older e-readers.

**Let's Learn Together** Feb 29 2020 This book contains six reproducible jigsaw units. Based on the principles of cooperative learning, jigsaw refers to a method of instruction in which students, working in groups, are dependent on the others in the group to gather information on a topic and to complete a task. Using jigsaw ensures

that every student is an active participant in the learning process. The units are designed for high school and adult students who need to improve their reading and discussion skills. These materials are designed for multi-level classes where the reading level ranges from intermediate to advanced level. The six topics in this book are: Illegal Gill Nets, Smoking Marijuana, Using Steroids, Immigration and Employment, Smoking Cigarettes in Public, and Seeing a UFO. [Nor'easter](#) Dec 09 2020

*People - Marine Mammal Interactions* Jan 02 2023 Our relationships with marine mammals are complex. We have used them as resources, and in some places this remains the case; viewed them as competitors and culled them (again ongoing in some localities); been so captivated and intrigued by them that we have taken them into captivity for our entertainment; and developed a lucrative eco-tourism activity focused on them in many nations. When we first envisaged this special topic, we had two overarching aims: Firstly, we hoped to generate critical evaluation of some of our relationships with these animals. Secondly, we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer-reviewed literature. We were also asking ourselves a question about what responsibility mankind might have to marine mammals, on our rapidly changing planet? The answer to the question; can, or should, humans have responsibility for the lives of marine mammals when they are affected by our activities? - is, in our opinion, 'yes' - and the logical progression from this question is to direct research and effort to understand and optimise the actions, reactions and responses that mankind may be able to take. We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area, and prove to be informative and stimulating.
